REMINDER

LAST DAY TO SUBMIT LETTER! HELP END FLOODING ON GREENS BAYOU

GBCC is currently working on obtaining federal funding for the Federal Flood Risk Management Project on Greens Bayou, which will fund large-scale flood control improvement projects. The Greens Bayou Mid-Reach Flood Damage Reduction Plan is the master plan for stormwater management along Greens Bayou which include 11 miles of channel improvements, the construction of four (4) stormwater detention basins, and the replacement or modification of 19 bridges. Funding for engineering services has been secured; however funding for design and construction of these solutions is still being pursued. GBCC is advocating on behalf of this project, the study for which was authorized 66 years ago.

TODAY IS THE LAST DAY TO SUBMIT A LETTER!

Please visit <http://greensbayou.org/help-end-66-years-of-unnecessary-flooding-on-greens-bayou/> to sign a letter regarding the detention project and such letter will be submitted on your behalf by the Greens Bayou Corridor Coalition to members of the United States Congress and the Administration.
